

Better ultrasound = better outcome.

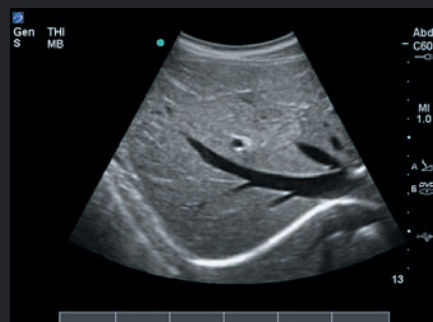

We engineered the M-Turbo ultrasound system to give you radically better image quality, with sharp contrast resolution and clear tissue delineation. You can better visualise detail, improving your ability to differentiate structures, vessels and pathology. Because the more you can see, the more you can do for your patients.

Parasternal long axis, captured with the M-Turbo ultrasound system using P21x/5-1 MHz transducer

Brachial Plexus, captured with the M-Turbo ultrasound system using the HFL38x/13-6 MHz transducer

Transverse Liver, captured with the M-Turbo ultrasound system using the C60x/5-2 MHz transducer

Superior image quality in
point-of-care ultrasound?
See for yourself.

SonoSite M-Turbo™

Ultrasound that lets you see more.
So you can do more.

The M-Turbo™ – It's ultrasound with the power to transform the way you practice.

Your drive to improve patient care has inspired the next generation of ultrasound. The SonoSite® M-Turbo ultrasound system is the most advanced system we've ever created. It delivers revolutionary image quality. All-new versatility. Refreshingly simple data management. All in a small, lightweight system that goes with you to the point of care.

A true workhorse, the M-Turbo can improve accuracy and patient care in a tremendous range of applications.

Backed by a 5-year warranty and our 24-hour loan programme for maximum up time.

Crisp and clear, featuring SonoHD™ Imaging Technology – with 16x the processing power.

Drop tested to withstand the real world.

Capture quality video clips up to 60 seconds long.

PC- and Mac-friendly for effortless data management with 2 high-speed USB 2.0 ports.

Backlit keyboard.

Go from off to scanning in less than 15 seconds.

Easy to clean and sanitise thanks to sealed elastomers.

Increased application flexibility with the optional Triple Transducer Connect.

Smaller than most laptops, this lightweight champion weighs under 3.8 kg.

Make your M-Turbo uniquely yours with one of five colourful choices.
